- Contributed software engineering expertise in development of both client and merchant products through the software lifecycle from the requirements through successful development.
- Engineered a full-stack, web3 project that incentive's consumers to make sustainable choice
- Leveraged React.js, Material UI and Node.js technology to ensure good user and merchant experience

### Freelance

Frontend Software Engineer

- Engineered scalable, responsive, multi-platform and SEO friendly websites for multiple clients using HTML5, CSS3 + BEM, JavaScript ES6+ and React best practises.
- Communicated business requirements with stakeholders and delivered high quality solutions.
- Connected to backend API's through CRUD HTTP requests.

## Projects

---

### Greenvibes Blockchain Application (Deakin Launchpad)

Can Show Code On Request

- Won the Education and Student Solution of the Year award from iAwards 2022
- Engineered a full-stack, web3 project that incentive's consumers to make sustainable choice from sustainable supply chains.
- Incorporates blockchain technology to improve traceability and transparency between food products.
- Developed mobile application layout and dashboard, Back-end infrustructure and Blockchain Technology.

## Delivery Tracker

<https://github.com/zbrydon/Delivery-Tracker.git>

- There was no efficient way to track delivery status of warehoused goods to supermarkets. Issues raised when goods arrived not fit for sell such as bad temperatures.
- Allows the Store and Warehouse track deliveries real-time using the Google Maps API. Allowed for tracking delivery status and temperatures using an adaptive dashboard
- Designed a full-fledged web application store and warehouse can use to track deliveries. Utilised: React, JavaScript, Node.js, MongoDB, Jest. MongoDB was utilised as cloud storage solution that traced stock for stores and warehouses.
- We were able to design a demonstrative system achieved and surpassed goals.

## Library E-Commerce Application

<https://library-react-i.herokuapp.com>

- Developed website layout, application, and functions layout.
- Designing textual and graphical content including product illustrations for the website.
